

1) IMPORTANT.

For both Windows PC and Windows Mobile installations, the Decimal Symbol in the Regional Settings (Control Panel) should be set to a “.” (dot) and not a “,” (comma) otherwise SXBlue HPSeed may not work properly.

2) Windows PC Installation

Microsoft .NET Framework 3.5 or above is required on your PC for the SXBlue HPSeed Desktop to work properly.

Windows 7 bundles .NET Framework 4.0 and should require no further installation. Windows XP users that keep up with Microsoft Windows Updates should also have the .Net 3.5 already installed.

The Microsoft .NET Framework 3.5 can be downloaded from Microsoft's Download Center at the following link: <http://www.microsoft.com/download/en/details.aspx?id=21>

3) Windows Mobile Installation

- Microsoft .NET COMPACT Framework 3.5 or above is required on your Windows Mobile device for the SXBlue HPSeed Mobile to work properly.

Windows Mobile 6.5 Pro should normally include the above version of .NET COMPACT Framework.

The Microsoft .NET COMPACT Framework can be downloaded from Microsoft's Download Center at the following link:

<http://www.microsoft.com/download/en/details.aspx?id=65>

- To install the SXBlue HPSeed Mobile application, simply extract and copy the content of the .ZIP file to a temporary folder on your mobile device. Locate the .CAB file with Windows Mobile File Explorer and click on the filename to install.
